INDEX TO THE SEGMENTS
OF THE NAMES

EXPLANATORY NOTES ON
INDEX TO THE SEGMENTS OF THE NAMES

The number in the first column shows the serial number of the name to which the particular segment belongs. The number in the second column shows the position of the segment as it appears in the particular name. The numeral 2 in the second column signifies, therefore, the position of the segment as it appears in the name and not the number of the segment in the segment pattern.

Due to punching errors in sorting the segments, the following five segments are wrongly placed after the segments which have 'h' as their initial letter:

1) kāvīṭikkūṭi, 2) tirunallūr-uṭaiyār, 3) tiruvēṅkatak-
kiramav(ittan), 4) mummuṭi-cōḷap-pōcaṇa and 5) umaīyāṇṭāl-
naṅkaiyār.
